

EUMOB MEETING 11-12 FEBRUARY 2016 BRIDGWATER

Participants

Alberto Laza (Centro San Viator)
Alfredo Garmendia (Centro San Viator)
Estela Arkarazo (Centro San Viator)
Jon Harding (Bridgwater College)
Rob Stuckey (Bridgwater College)
Freddy Ash (Bridgwater College)
Iain Sparkes (Bridgwater College)
Lone Olsen (SyddanskErhvervsskole)
Magnus Ejlserskov (SyddanskErhvervsskole)
JesusMariaLopez (Tecnalia)
Alberto Peña (Tecnalia)
Adrian Martin (Tecnalia)

11/02/2016

Bridgwater College makes a short presentation showing the students and the activities that carries out in all areas.

Alfredo informs about the meeting with the National Agency in Madrid where we were told about the news of the programme and some interesting points such as the importance they give to the dissemination, as well as, how to do the intermediate report, the required documentation to be sent and the dates.

Review of the chronogram: where are we?

Every member comments what has been done during this period of time and shows all the advances done up to now. Alfredo will prepare the formats for all the required documents and all the contents so they all follow the same structure. He will place them in the Dropbox.

Review: 01/A3 Course design

package 1 Bridgewater
Package 2 Bridgewater
 safety/awareness SDE
Package 3 SDE
Package 4 San viator
Package 5 Tecnalia

We talk about the participants for the piloting (students). Ian Sparkes, from Bridgwater College, comments that as now he has more time he will start working with his students. We

check the contents uploaded in the Dropbox and the methodology to follow. We comment that it is necessary to change the logos mentioned in the meeting with the National Agency.

We have to agree on the students' assessment and the papers that the students have to fill out to evaluate them. One of the main points is the knowledge and the competences the participants have to achieve. We agree that the formats developed in Automovet, adapted to our project's necessities, are the most suitable option.

We present the formats and the structure of the modules, as well as the assessment sheets for the students. We explain there should be a feedback for the students, in such a way that they understand the process and the rules used for their assessment. All these documents are going to be available in Dropbox.

We will also upload a format named MEMORANDUM" to fill out before the mobilities and the students will get a certificate at the end of the process.

O1/A4 MODULES CONTENT

Each partner explains where they are at the moment and shows more or less what they intend to do and how are going to organize it.

We have a look at the project website to see how we can improve it and how to take a suitable approach to it.

Tecnalia presents the DYNACAR and shows how it works and how far they have reached. Through the PC and the steering wheel, some teachers test the software to learn how it works and if it is useful for the students.

O1/A6 PILOT COURSE

We set the dates to begin the mobilities with the first students:

Destination:

- Spain from 29th to 30th of April 2016 (journey)
- Denmark from 1st to 2nd of June 2016 (journey)
- England from 1st to 2nd of June 2016 (journey)

We need to know the students' profiles and the competences they have. Once the mobility finishes, John will send a survey to the students.

12/02/2016

O2/A1 Share the mobility systems in each partner country

We discuss and agree the possibility of using SKYPE for the contact among the members. Bridgwater shows a document, uploaded in Dropbox, with the information of the UK with the different types of vehicles.

SDE has not finished it yet so they are required to make it as soon as possible.

Centro San Viator shows its Power Point about the researched carried out in relation to the use of the electric cars in Spain and in the different autonomous regions.

Prepare the first multiplier event

Each country has to run a multiplier event and we recall about the structure and the issue to be addressed. Alfredo will prepare a leaflet so all partners use the same one.

MILESTONES

11-12-FEBRUARY 2016

O3 A2 MATRIX (SDE)TEMPLATE	18/03/2016
